2/25 Ginger Street
Paget QLD 4740
Phone: 61-7-4952 2844

The ALS Laboratory Group is pleased to announce the launch of a new Division. The Industrial Division complements the services provided by the Group's existing Mineral, Environmental, Coal, Tribology and Food/Pharmaceutical global operations.

The Industrial Division was established following the acquisition of PearlStreet Limited in January 2010. PearlStreet was the largest Non Destructive Testing & Inspection service provider in Australia, formed through industry consolidation – a coming together of Integrated Power Services (IPS), ETRS, Metlabs, Australian NDT and Accura.

ALS and PearlStreet share a strong commitment to the delivery of high quality technical services, safe work practices, application of advanced technology and building of long term partnerships with clients.

Today, the ALS Industrial Division employs over 590 staff and operates out of 25 sites in Australia. The Division primarily serves the Energy, Resources and Infrastructure sectors. It provides Non Destructive Testing & Inspection, Integrated Condition Monitoring, Engineering & Materials Consulting, Mechanical Testing, Asset Management, Heat Treatment and Shutdown Planning & Execution Services.

With the addition of the Industrial Division, ALS now employs over 2000 staff at 60 sites in Australia. Globally, ALS employs over 6000 staff at 160 locations in 40 countries.

ALS plans to complete the integration process in Australia before leveraging its global footprint and client relationships to expand the Industrial Division overseas.

Please do not hesitate in contacting us should you require any further information.
