

ALS Salt Lake City, UT

Microbiology / Mycology

Industrial Hygiene

- TO-14, 15
- Beryllium
- Diesel Particulates
- Pesticides and Herbicides Scans
- TO-17
- Silica
- Methamphetamine
- GC/MS Screens
- Metals Panels
- Aldehydes and Amines
- Antineoplastic / Chemotherapy Drugs

Environmental

- Perchlorate (6850)
- White Phosphorus (7580)
- NDMA
- Explosives/Nitroaromatics
- Vapor Intrusion
- Chemical Agent Breakdown Products by LC/MS
- SW-846 Methods
- EPA CLP
- DoD
- SEDD (Staged Electronic Data Deliverable)

Microbiology/Mycology

- Non-Viable Fungal Spore Analysis
- Viable Fungal and Bacterial Analysis
- Microbial Identification
- Endotoxins/Mycotoxins
- Coliforms and E. coli 0157:H7

Dietary Supplements

- Vitamin Analysis
- Pesticides Screens
- Minerals Analysis
- Heavy Metals

**RIGHT SOLUTIONS
RIGHT PARTNER**

Problem: In today's working environment, the Industrial Hygienist (IH) has the challenge of solving a variety of indoor biological contaminant concerns. With the emerging field of environmental/microbiology/mycology, the IH's job is no longer limited to chemical exposure monitoring. Microbial indoor air contamination is an increasing concern, in residential, medical, industrial, governmental, and educational environments and buildings. Bacteria and Fungi are found in virtually every environment both indoors and out, feeding on various materials and growing under a variety of conditions. Sources include:

Air	Cellulose Based
Decomposing Plant Matter	Building Materials
Household Dust	Food Items
Various Paper-Based Products	Soil and Water

Solution: ALS Environmental offers a full array of Microbiological and Mycology Services, including Endotoxin and Mycotoxin Analyses.

ALS Laboratory Group provides:

- Competitive pricing
- Top quality defensible data
- Over 35 years experience offering industrial hygiene services

We continue to deliver on performance excellence so that we will remain the right choice with the right solutions for all your environmental testing needs.
