

Coal Quality Course

13-15 September 2022

The Coal Quality Course provides an understanding of the importance of managing coal quality from the exploration to mining and transportation. It also provides an overview of the end-use of coal in the cokemaking and power generation sectors and the impact of coal quality on these processes. The course emphasises the need to optimise a coal resource and a product's specifications to deliver a saleable product to the end user and to maximise profitability.

This course is an ideal introduction for newcomers to the coal industry, particularly young professionals or more senior personnel transferring from other mining disciplines who need to understand the "bigger picture" behind coal quality. Over the years, several thousand people have been through this course in countries including Australia, Mongolia, Canada, South Africa, New Zealand, Singapore, Malaysia, Mozambique and more.

The course includes two and a half days of lecturing and a half-day tour of the Brisbane and Riverview coal laboratories. A textbook is also provided which covers the topics addressed during the course.

Brisbane

Topics covered

An Introduction to Coal

coal formation, coal rank, coal type, coal impurities and coal classification.

Sampling

precision, accuracy, bias, uncertainty, the seven golden rules of sampling, manual sampling, automatic samplers.

Coal Analysis

coal analytical tests and laboratory calculations, laboratory quality control.

Resource Evaluation

simulation of breakage behavior, washability, liberation studies, simulation of potential products.

Coal Preparation

dilution due to mining, size partitioning, density partitioning, separation efficiency, an overview of the operation of a coal preparation plant and the objectives of running a coal preparation plant.

Coal Combustion

the PF power-station and the impact of coal quality on power generation, and environmental considerations.

Coal Carbonisation

the transformation of coal to coke, use of coal in the coke oven and the impact of coal quality on coke quality, the impact of coke quality on blast furnace performance.

Optional

A 2 hour tour of Brisbane Coal Laboratory will be conducted.

Presenters

Adrian Reifenstein

ALS Coal - General Manager

30+ years' experience in coal analysis, coal technology and research in Australia and Canada.

James Bottle

ALS Coal - Coal Technology Manager

15+ years' experience in coal analysis & coal technology.

Alan Pickup

ALS Coal - Quality & Technical Coordinator

30+ years' experience in coal analysis, coal preparation and quality management.

Don Holcombe

ALS Coal - Principal Consultant, Thermal Coal

30+ years' experience in coal evaluation and consulting for coal-fired power generation.

Ross Price

ALS Coal - Superintending Manager

20+ years' experience in coal mining, analysis and coal superintending.

Registration AU \$2000 + GST.

Payment is required before the course. Please select your payment option:

Bank Debit Purchase order Credit Card

If you choose to pay via Credit Card, please phone +61 7 3713 8400 to confirm your booking and we will process your credit card payment.

or print, complete, scan and email to kym.hoger@alsglobal.com

Course information

When

13-15 September 2022

Venue

ALS Coal (Head Office)
478 Freeman Road
RICHLANDS QLD 4077

Registration by

Monday 5 September 2022

Additional

Lunch, refreshments, a certificate and extensive course documentation are included.
