

right solutions.
right partner.

Immunogenicity services for biopharma innovation

ALS is a trusted partner for immunogenicity testing in biopharmaceuticals. Through our new Hyderabad facility, we deliver a full suite of advanced testing services, backed by regulatory insight and scientific expertise, to help progress your programs.

From discovery to batch release, we provide comprehensive support across your development journey in our dedicated GMP-compliant laboratory.

Our core capabilities & services portfolio

- Immunogenicity assays (PBMC)
- Innate immune profiling using Raw Blue™ cell-based assays
- ELISA
- Multiplex cytokine analysis
- Immunophenotyping
- Method development
- Method validation
- Sample analysis
- Method optimization & transfer
- Custom immunogenicity assays.

Our laboratory design & controls

- Grade D cleanrooms
- Dedicated AHU Systems
- Segregated workflows
- Dedicated pass boxes and waste corridors
- Strict gowning & access control.

Uncompromising compliance: your foundation for regulatory success

We operate with an unyielding commitment to quality and compliance to support you.

- ICH guidelines
- FDA and other global regulatory guidelines
- 21 CFR Part 11-compliant data systems.

Partner with our experts for your next journey.

Discover how ALS experts in India can become seamless extension of your team, supporting your path to market.
