

Coal Quality Course

The Coal Quality Course provides an understanding of the importance of managing coal quality from the exploration to mining and transportation. It also provides an overview of the end-use of coal in the cokemaking and power generation sectors and the impact of coal quality on these processes. The course emphasises the need to optimise a coal resource and a product's specifications to deliver a saleable product to the end user and to maximise profitability.

This course is an ideal introduction for newcomers to the coal industry, particularly young professionals or more senior personnel transferring from other mining disciplines who need to understand the "bigger picture" behind coal quality. Over the years, several thousand people have been through this course in countries including Australia, Mongolia, Canada, South Africa, New Zealand, Singapore, Malaysia, Mozambique and more.

The course includes two and a half days of lecturing and a half-day tour of the Brisbane and Riverview coal laboratories. A textbook is also provided which covers the topics addressed during the course.

BRISBANE

Topics covered

An Introduction to Coal

coal formation, coal rank, coal type, coal impurities and coal classification.

Sampling

precision, accuracy, bias, uncertainty, the seven golden rules of sampling, manual sampling, automatic samplers.

Coal Analysis

coal analytical tests and laboratory calculations, laboratory quality control.

Resource Evaluation

simulation of breakage behavior, washability, liberation studies, simulation of potential products.

Coal Preparation

dilution due to mining, size partitioning, density partitioning, separation efficiency, an overview of the operation of a coal preparation plant and the objectives of running a coal preparation plant.

Coal Combustion

the PF power-station and the impact of coal quality on power generation, and environmental considerations.

Coal Carbonisation

the transformation of coal to coke, use of coal in the coke oven and the impact of coal quality on coke quality, the impact of coke quality on blast furnace performance.

Optional

a 3 hour inspection of two coal laboratories.

Presenters

Adrian Reifenstein M.Sc.
Business Manager, Coal Technology & Exploration

25 years' experience in coal analysis and carbonisation testing and research in Canada and Australia.

James Bottle
Business Unit Manager, Coal Technology

has 10 years' experience in coal analysis, coal mining and carbonisation testing.

Alan Pickup ADAC, ADBLT, Grad Dip Eng
ALS Coal – Quality & Technical Coordinator

32 years' experience in coal analysis, quality and coal preparation.

Don Holcombe B.E.
ALS Coal – Principal Consultant, Thermal Coal

30 years' experience in coal evaluation and consulting for coal-fired power generation.

Registration and payment

Registration AU \$1500.

Payment is required before the course. Please select your payment option:

Bank Debit Purchase order Credit Card.

If you choose to pay via Credit Card, please phone +61 7 3713 8400 to confirm your booking and we will process your credit card payment.

Course information

When

13, 14 and 15 February 2019

Venue

ALS
478 Freeman Road
Richlands QLD 4077

Registration by

8 February 2019

Additional

Lunch, refreshments, a certificate and extensive course documentation are included.

All enquiries

Kym Hoger

+61 7 3713 8400
CQC@alsglobal.com

To secure your booking, please complete the form on the left and return to Kym Hoger along with your method of payment by 8 Feb 2019. ALS reserves the right to cancel the course if there are insufficient participants.

Rates exclude accommodation, meals and leisure facilities at hotels. Delegates will be responsible for their own costs relating to room service, spa treatments, bar and mini bar.

or print, complete, scan and email to CQC@alsglobal.com
