The ALS facility in Everett, Washington is an analytical testing laboratory designed to analyze air, water, wastewater, soil, sludge, solids, waste oil, solvents, and hazardous waste samples associated with a variety of chemical and toxic contaminants. We are accredited by the Washington State Department of Ecology, and we routinely participate in EPA and other agency performance evaluation programs with a proven track record of stellar performance. ALS provides professional analytical services for state and local governmental agencies, consulting firms, and private industry.

These projects involve analytical testing services in the following areas:

- Soil remediation
- RI/FS
- Groundwater monitoring
- Municipal landfill monitoring
- Hazardous waste management
- Environmental assessments
- UST removal projects
- Process control

Performance is everything and our reputation depends on your satisfaction. If you are looking for a reliable environmental testing provider, ALS is the right partner for you.
