

The ALS laboratory in Calgary has recently expanded to a new, state-of-the-art facility, incorporating the latest technology and the most talented expert chemists and scientists to provide full-service analytical support to our clients. Having cutting-edge equipment and instrumentation such as GC/MS for organics and ICP/MS for trace level environmental analysis allows us to manage a wide variety of sample types. As a CALA accredited laboratory, we are always looking to expand our scope of services and improve methods. Access to the global ALS network provides the most diverse menu of testing capabilities in North America.

Many of the world's most successful consulting and engineering firms, industrial companies, and governmental agencies have benefited from ALS' superior testing services. While ALS is the world's largest analytical testing provider, we have retained the personal touch that defines exceptional customer service.

## Our Expertise Includes

### Organic Capabilities

- Hydrocarbons
- GCMS Volatiles: BTEX, VOCs, etc
- GCMS Semi-Volatiles: PAHs
- Waste Characterization
- Ethane, Ethene, Methane
- Alcohols and Glycols
- BIC Index

### Microbiology/IH Capabilities

- Total Coliform and E. Coli by MPN
- Fecal Coliform by MF
- HPC
- BART testing

### Inorganic Capabilities

- ICPMS and ICPOES Metals
- Mercury by CVA

- TCLP/Metals/Inorganics
- General Wet Chemistry
- Major Anions and Cations
- Soil Salinity Analysis
- Particle Size Analysis
- Hot Water Boron and Extractable Barium Analysis

### Value-Added Services

- Dedicated Project/Account Managers
- Flexible Report Styles
- Customized EDDs
- Experienced & Degreed Chemists
- Dependable & Professional Staff

## SERVICE

- On-time data delivery and rapid TAT
- Experienced staff with expertise
- Available after-hours and weekends

## VALUE

- Instant access to data with Webtrieve™ and Webtrieve™ Mobile App
- Custom bottle kits with pre-printed labels and COCs

## RELIABILITY

- Technical experts that can answer your most difficult questions
- A real focus on quality and process control with a rigorous QA/QC program
