Local Expertise & Services

The ALS laboratory in Edmonton is the **premiere full-service organic, inorganic and industrial hygiene laboratory** in Western Canada. As one of the largest laboratories in the ALS Global network, the Edmonton location has been delivering reliable testing services with unsurpassed quality for more than 30 years.

Our clients include successful organizations across the globe in all sectors of oil and gas industry, government and consulting and engineering. We pride ourselves on the strong relationships we have with all our clients and we achieve this by making customer service a top priority. ALS takes customer service a step further with a number of specialty services available 24 hours a day & 7 days a week, after hours emergency sample receipt, in-depth technical expertise, Webtrieve™ online data access, and many more value-added services. With ALS as your environmental testing partner, you will benefit from superior quality and integrity, and a customer focus on service and reliability.
